

The background of the slide is a close-up, slightly blurred photograph of a sheet of music. It shows several horizontal staves with black musical notes, stems, and clefs. The lighting is soft, creating a warm, golden-brown tone across the page. The text is overlaid on this background.

# Digital Music Database Project

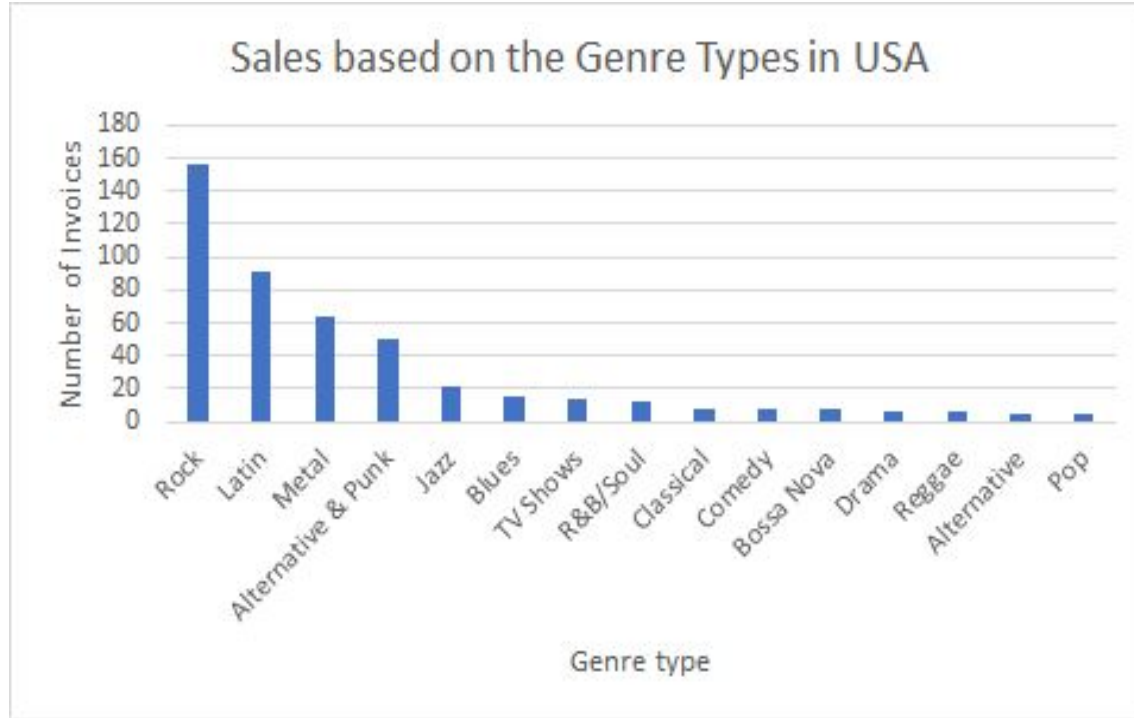

-Anupama

# Media type usage for Tracks

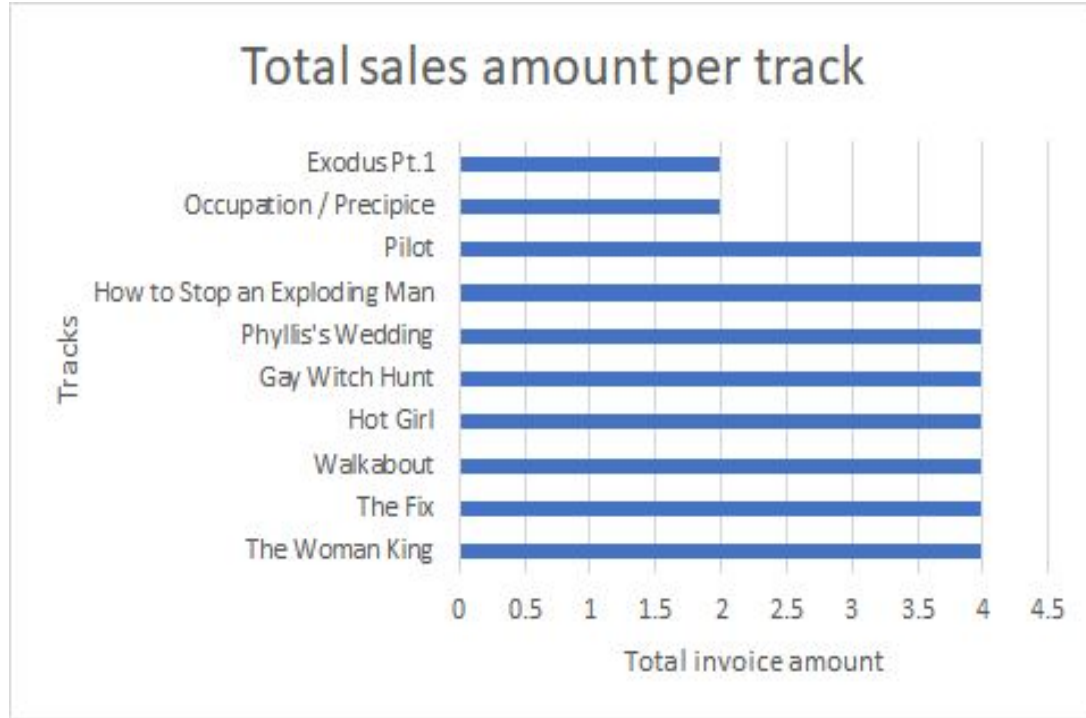

As we can see MPEG audio file format was used to play the tracks highest number of times. Purchased AAC Audio file was used the least and Protected AAC audio file stands in the second place. However, no other media type is even close to number of times MPEG audio file is used.

# Genre type distribution in USA

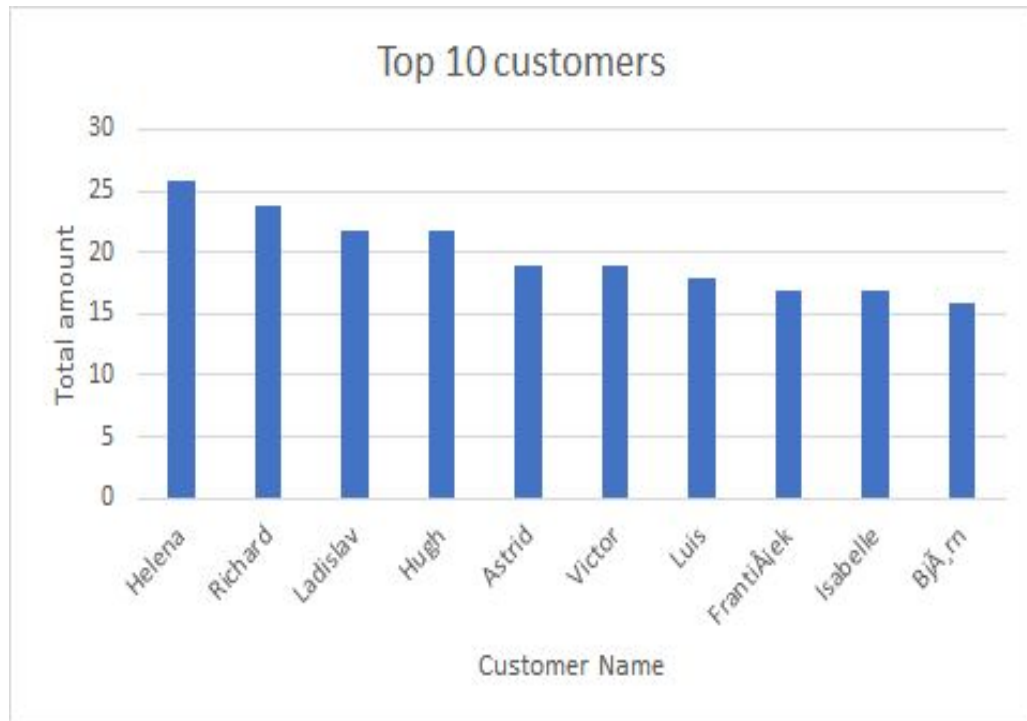

From the chart on the left which shows the Top 15 Genre types in USA it is very evident that Rock is the most popular Genre Type and Latin is the next favorite for people. While pop, Reggae and Drama sounds interesting, not many people in USA seems to like it as much as they like Rock, Latin or Metal.

# Total sales amount per track

As we see from the chart, the top 3 tracks which made close to \$4 sales were Walkabout, The Fix and The Woman King from Battlestar Galactica, Season 3, Heroes (Season 1) and Lost (Season 1) respectively.

# Top 10 customers

The chart shows the customers who spent the most amount of money on the tracks and albums. The regions from which the top customers hail is equally distributed across the world. The highest purchase was from a Czech Republic customer.
